

Prism Suite automates Windows configuration management to improve operational efficiency.

Prism Suite - The desktop management solution that works the way you do.

Prism Suite delivers powerful, flexible, and affordable Windows system configuration management. Administer all the computers across the organization — including remote and mobile systems — from any location with Internet access. Streamline processes down to a few mouse clicks. Dramatically reduce user downtime to boost productivity. Get granular insight into your environment to make better decisions about IT spending and resource utilization. Improve security by automating software patching, and finding and removing unauthorized software, including malware. Install and update software up to five times faster than native installation routines. And do it all automatically to eliminate manual processes and drive new IT administration efficiencies.

Prism Suite. Next-generation configuration management for today's IT professional.

Next-generation configuration management

Asset Management
Software Deployment
Patch Management

Next-generation configuration management for any time, any place administration.

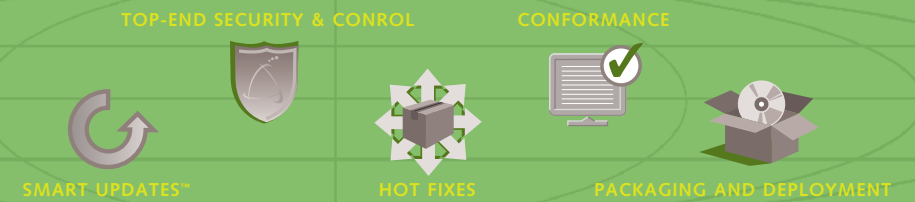

- Internet-based administration of distributed environments and the mobile workforce
- Automated configuration management supports compliance with company standards and regulatory measures
- Exclusive Smart Update™ technology for real-time conformance
- Flexible design delivers the management functionality you want
- Security features ensure top-level control and protection

Take control of your IT environment.

Customize your management solution with the tools you need most.

Prism Suite®.

A sensible approach to Windows configuration management. Fast. Easy. Efficient.

There's no shortage of bloated management suites and all that comes with them. The weeks of training. The unwanted functionality. The hidden costs. Too often the very tools that were supposed to streamline your IT operations leave you mired in complexity, unexpected costs, long hours and missed deadlines.

Now there's a better way.

Prism Suite delivers a sensible combination of the tools that Windows administrators need and use most. With Prism Suite you only pay for what you need. You get the most productive combination of functionality to do your job, and you never pay extra for tools you don't need.

Secure Internet-based Administration.

Prism Suite is engineered for today's dynamic computing environment. It delivers simple, secure Internet-based administration of widely distributed environments and the mobile workforce. And you can use Prism Suite to manage your Windows systems from any location with an Internet connection.

Leading Edge Technology – Today.

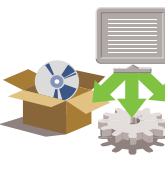

Prism Suite delivers robust management features that leverage advanced hardware and software technologies. With full support for 64-bit hardware and software. Packaging of all 64-bit applications for deployments up to five times faster than native Windows installations. And our Smart Update™ technology that automates and streamlines desktop, laptop, and server configuration management.

Try it the Prism way.

Prism lets you build a management suite to fit the way you work.

- 

Internet-based Administration.
Prism Suite makes managing your mobile workforce and widely distributed environments easy, and enables secure administration from any remote location with an Internet connection.
- 

Robust Functionality.
Prism Suite delivers the automated desktop management functions you use the most – asset management, software deployment and patch management.
- 

Flexible Modular Design.
Prism Suite is offered as an integrated configuration management solution and as a set of individual products, so you only buy what you really need.
- 

Open Architecture.
Prism Suite features an open architecture that lets you customize it to fit your needs and even add third-party applications to the Prism Console.
- 

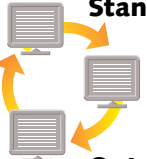

Security.
Prism Suite improves network security by discovering, reporting on, and removing unauthorized software, spyware and other non-standard applications. Prism Suite makes it easy to ensure computers are patched to required levels.

- 

Configuration Compliance.
Prism Suite helps you easily configure servers, desktops, and laptops to comply with corporate IT standards and regulatory measures.
- 

No Hidden Costs.
Eliminate unnecessary training and consulting expenses. Prism Suite is powerful configuration management that's easy to learn, easy to use and easy to implement.
- 

Comprehensive Reporting.
A dynamic reporting engine creates standard or customized reports that match your processes and help you make better, more informed decisions.
- 

Smart Update™.
The driving technology behind Prism Suite, Smart Update automatically targets computers with the right software, update or patch based on any configuration set by the administrator. Your environment is continuously monitored and self-healing.
- 

Standards Compliance.
Prism Suite helps you standardize server, desktop and laptop configurations to drive improved IT and organizational efficiency.
- 

Outstanding Support.
New Boundary Technologies is recognized as a leader in providing high-quality customer support. Our support center is staffed by highly trained, knowledgeable technicians who take pride in being the most responsive in the industry.

"Prism dramatically reduced the amount of time needed to set up new workstations and reconfigure old ones. It provides us with the means to manage software and track licenses as well as maintain our software with updates and patches."

Ken Christman
SERA Architects

"Getting the core banking applications installation time down from 75 minutes to under 15 minutes per computer meant Prism Deploy would pay for itself a couple of times over during the first rollout."

Cameron Frasnely
PremierWest Bank

"With Prism, we are able to monitor systems to remove viruses and spyware and maintain a very corporate computer environment. We no longer have to worry about unauthorized or inappropriate software being installed on our systems. We've also reduced IT visits to satellite offices by more than 50 percent, which is saving us \$15,000 per year."

Kelly Hooper
Cando Contracting LTD

"We were able to complete a company-wide Office upgrade with one click and our highest success rate ever using Prism. And New Boundary Technologies customer support is actually the best I have ever dealt with. It's amazing how much they know."

Elliston Kieng
Input/Output

"Prism is a great product - very easy to learn and easy to use. We use it to tailor-make software installations and speed up application deployment so we can spend less time deploying software and more time devoted to projects and providing customer service to our end-users. And I can't say enough good things about customer support. Every time I call I get a technician who is always very helpful and understanding."

David Weir
Corvallis Clinic
